

Volta Forage Oats

- ✓ Highest DPI rated leaf rust resistance
- ✓ High yielding/medium maturity
- ✓ Excellent grazing recovery
- ✓ Quick to first cut/grazing

Volta showed incredible yield results in farm trials right across Australia.

“We’re rapt in Volta because of the quantity and quality of forage and rust resistance” *Ann Loughnan – “Bowann” Roma*

Nugene Forage Oats

- ✓ High yielding/late maturity
- ✓ Quick establishment/first grazing
- ✓ Palatable, broad, thick leaves

Jeff Rossington in Nugene at West Haren

“Outstanding feed quality and yield despite very little winter rain”

Jacob Hawley – Manilla

“We have been very happy with Nugene over the years”

Brian Duddy – “West Haren” St George

Crackerjack

“A fantastic crop with a huge body of feed”

Peter Hess – Kingsthorpe

“The Crackerjack was planted on marginal moisture, and we still achieved up to 25mt/Ha of chopped silage. It's yield potential is enormous”. *John Wilke, "Lumeah" Beaudesert*

Dual Purpose Triticale

Crackerjack is a high performing dual purpose Triticale, bred to provide both high forage and grain yields. Crackerjack has the advantage of good early vigour and the ability to produce extremely high DM yields and good quality grain.

- ✓ High yielding triticale in silage, feed and grain
- ✓ Exceptional early vigour
- ✓ Excellent disease resistance profile

Dictator

“I can't stock it heavy enough”

Grant Maudsley – “Nalpa Downs” - Mitchell

“Nothing comes close to Dictator for hay or silage” *Cameron Wilson – Tamworth*

Awnless Forage Barley

- ✓ Suitable for grazing, hay and silage
- ✓ Highly palatable leaf, stem and seed head
- ✓ Fastest winter growth of all winter cereals
- ✓ Rapid establishment and early growth
